

Supplementary Fig. S1. IL-6 and sIL-6R circulating levels in three TA groups identified by cluster analysis.

(A) and (B) Boxes show 25th and 75th percentiles. Horizontal lines within boxes show medians. Vertical lines below and above boxes show 10th and 90th percentiles: * $p < 0.01$; ** $p < 0.001$.

(C) The columns show the percentage of patients with positive 18F-FDG PET/CT findings.
