Supplementary Table S1. Comparison of nailfold capillaroscopy findings and EPC levels in patients with Behçet's disease with or without clinical vascular manifestations.

	Patients with vascular manifestations (n=17)	Patients without vascular manifestations (n=25)	*p* value
Nailfold capillaroscopy findings			
Abnormal	10	13	0.663
Dilated loops (20-50 μm) ≥2 in at least 2 fingers	9	10	0.408
Mega capillaries (>50 μm)	3	6	0.716
≥2 in at least 2 fingers	1	2	1
Capillary tortuosity	1	4	**0.011**
Micro haemorrhages	1	6	0.21
≥2 in at least 2 fingers	1	0	0.405
Reduced vascular density	1	2	1
Granular flow	0	1	1
	Patients with vascular manifestations (n=7)	Patients without vascular manifestations (n=11)	*p* value
Endothelial progenitor cells			
Percentage (%) Median [IQR]	0.0192% [0.0124-0.0283]	0.0271% [0.0173-0.0363]	0.285

IQR: interquartile range.
