sTyro-3 and sAxl in MPA and GPA / T.G. Lee et al.

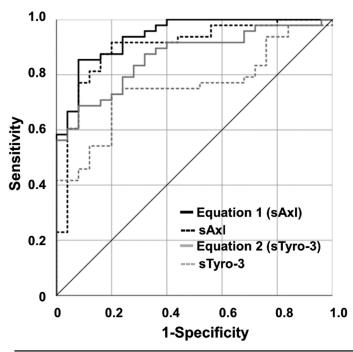

Supplementary Fig. S1. Comparison of the serum concentrations of sTyro, sAxl, and sMer between GPA and MPA patients.

GPA: granulomatosis with polyangiitis; MPA: microscopic polyangiitis; NS: not significant.

Supplementary Fig. S2. Comparison of the serum concentrations of sTyro, sAxl, and sMer between patients with MPO-ANCA (or P-ANCA) or PR3-ANCA (C-ANCA) and those without.

1

<u>Variables</u>	Area	P-value	95% CI
Laboratory results			
Equation 1 (sAxI)	0.941	< 0.001	0.889, 0.992
sAxI	0.899	< 0.001	0.820, 0.978
Equation 2 (sTyro-3)	0.865	< 0.001	0.784, 0.946
sTyro-3	0.754	<0.001	0.644, 0.864

Supplementary Fig. S3. Comparison of area under the curves of equation 1, sAx1, equation 2, and sTyro-3.

CI: confidence interval.
