ROC: receiver operating characteristic; FASmod: modified Fibromyalgia Assessment Status; CI: confidence interval; LR: likelihood ratio.

*optimal cut-off point (Younen index).

Supplementary Table S4. Pairwise comparison of ROC curves, respectively FIQR vs. FASmod and FIQR vs. PSD.

FIQR vs. FASmod	
Difference between areas	0.0138
Standard error*	0.0055
95% confidence interval	0.00297 - 0.0245
z statistic	2.500
Significance level	p=0.0124

FIQR vs. PSD	
Difference between areas	0.0459
Standard error*	0.0064
95% confidence interval	0.0333 - 0.0585
z statistic	7.144
Significance level	p<0.0001

ROC: receiver operating characteristic; FIQR: revised Fibromyalgia Impact Questionnaire; FASmod: modified Fibromyalgia Assessment Status; PSD: Polysymptomatic Distress scale.
