

Supplementary Fig. S1. Distribution of patients for each age.

Supplementary Table S1. Distribution of imaging modalities at diagnosis between patients with YOTAK and those with LOTAK.

<i>At classification</i>	YOTAK (n=47)	LOTAK (n=91)
Conventional angiography	20 (42.6)	30 (33.0)
Computed tomography angiography,	23 (48.9)	50 (54.9)
F-18 fluorodeoxyglucose-positron emission tomography	4 (8.5)	7 (7.7)
Magnetic resonance angiography	0 (0)	4 (4.4)

Values are expressed as number (percentage).

TAK: Takayasu's arteritis; YOTAK: young-onset TAK; LOTAK: late-onset TAK.
