
How to obtain further information about the Childhood Health Assessment Questionnaire (CHAQ) and the Child Health Questionnaire (CHQ)

With permission of the developers, leadership for this project was granted and carried out by the Paediatric Rheumatology International Trials Organisation (PRINTO). All the translated versions of the Childhood Health Assessment Questionnaire (CHAQ) and of the Child Health Questionnaire (CHQ), as printed in this supplement, are copyrighted material and have been reproduced with permission for illustration purposes only from the original developers and exclusive copyright holders of the 2 instruments: Dr. G. Singh for the CHAQ, and J.M. Landgraf for the CHQ. All legal rights remain with the respective developers.

The reader may not reproduce or photocopy any of the questionnaires as printed in this supplement without written permission from the original developers and copyright holders of these questionnaires, G. Singh and J.M. Landgraf.

The results of this project are considered developmental and preliminary until further work is done to evaluate the psychometric properties of the CHAQ and the CHQ translations in different population samples and, only for the generic CHQ, also for other diseases.

The general policy is to grant the use of the cross-culturally adapted and validated translations of the CHAQ and/or the CHQ on a royalty free basis to individual researchers, public hospitals and/or universities. Information about the CHAQ and the CHQ in rheumatology can be obtained from PRINTO and/or the original developers. Distribution and permission to use the CHAQ and/or the CHQ is granted only by the original developers.

Permission to use the cross-culturally adapted and validated translations of the CHAQ and/or the CHQ for resale or other commercial applications (e.g. pharmaceutical companies) may be granted upon written agreement. Information about the CHAQ and the CHQ in rheumatology can be obtained from PRINTO and/or the original developers. Agreements are granted only by the original developers.
